Common Types of Driving Test Questions in Punjabi

Driving tests typically comprise two main segments: the written theory exam and the practical assessment. Each segment features distinct question formats tailored to assess knowledge, judgment, and skill.

1. Written Theory Questions

Written theory tests assess a candidate's grasp of traffic rules, road signs, and safety protocols. In Punjabi, these questions are usually presented as multiple-choice or short-answer formats.

1. Multiple-Choice Questions (MCQs) – Candidates select the correct option from four or five choices.
2. True/False Statements – Determining the validity of a given traffic rule.
3. Fill-in-the-Blank – Completing a sentence with the correct traffic term.
4. Scenario-Based Questions – Analyzing a traffic situation and choosing the best action.

2. Practical Test Questions

The practical segment evaluates real-world driving ability. While the examiner's instructions are in Punjabi, the questions are implicit, focusing on:

- Vehicle start-up and shutdown procedures.
- Basic maneuvers: forward, reverse, parking, and lane changes.
- Observing and obeying traffic signs and signals.

- Safe driving practices: speed control, seat belt use, and hazard awareness.
- Emergency handling: skid recovery, sudden obstacle avoidance.
