History of Scuderia Ferrari in Formula 1

Early Years (1929 1950)

Scuderia Ferrari was founded in 1929 by Enzo Fermi and later purchased by Enzo Ferrari in 1947. While the team originally focused on sports car racing, its foray into Formula 1 began in 1950, the year the World Championship was inaugurated. Ferrari's first F1 car, the 125 S, was powered by a 1.5 litre V12 engine, a testament to the company's engineering ambition. The 1950 season saw Ferrari finish second in the Constructors' Championship, a remarkable achievement for a debutante.

The Golden Era (1950s 1970s)

The 1950s marked a golden age for Ferrari, highlighted by the legendary 1951 season when the team secured its first Drivers' and Constructors' titles with Alberto /Ascari. The 1960s brought further success, with drivers like Phil /Hill, John /Surtees, and later Niki /Lauda capturing multiple championships. Ferrari's 1967 "F1 500 /cc" car, the *F1 500 /cc*, demonstrated the team's commitment to pushing technical boundaries. The 1970s, however, were a mixed period; while Ferrari won the Constructors' title in 1975, the team struggled to maintain consistent dominance.

Modern Era (1980s Present)

The modern era of Scuderia Ferrari began in earnest in the 1990s, when the team partnered with the powerful engine manufacturer *Petronas* and hired the legendary engineer Mauro Cattaneo. The 1996 season marked Ferrari's first Drivers' title in 24 years, with Michael Schumacher taking the championship. The partnership with Schumacher and later drivers like Fernando Alonso and Sebastian Vettel propelled Ferrari to multiple consecutive titles, especially in the 2000s and early 2010s. Today, Ferrari remains a powerhouse, consistently challenging for podiums and championships, while continuing to innovate in aerodynamics, hybrid power units, and data analytics.
